PROFILE

As an aspiring Front-End Developer, I am dedicated to transforming technical concepts into clean, user-centric digital solutions. Blending a sharp eye for detail with a passion for continuous learning, I am eager to collaborate with cross-functional teams, absorb industry best practices, and deliver reliable code that enhances the user experience.

WORK EXPERIENCE

Arete Viva Seo (November 2024 - October 2025).

UI/UX Designer

- Combining user-centered interface design with highconverting visual strategy.
- Designing seamless digital interfaces alongside sales-driven assets like optimized Amazon product listings, A+ content, and social media materials.
- Leveraging creative intuition and user behavior insights to elevate brand presence and maximize conversions.

RABS International (October 2025 - June 2026).

Creative Lead

- Specializing in high-impact visual communication by capturing audience attention and maximizing brand visibility.
- Creating engaging social media posts to drive online interaction alongside large-format advertising boards.

Chitra Tech (June 2026 - September 2026).

Frontend Developer Intern

- Dedicated to crafting interactive, high-performance web interfaces.
- Combining clean code with strong design principles.
- Maximizing brand presence and usability across digital touchpoints.

AWARDS

KCC Quiz competition, 2023

Runner Up

CERTIFICATIONS

IT Workshop, 2022 Mid Valley International College

- Kathmandu

Hackathon, HimalAI , 2025

- Kathmandu

COLLEGE WORKS

HopeDrops

A real-time blood bank platform built to connect donors with emergency requests, streamline inventory tracking, and speed up life-saving blood distribution.

Weather Tracker

An automatic geolocation support and dynamic weather condition updates, complete with animated forecasts for an engaging user experience.

Car Game

An interactive arcade-style driving game featuring smooth player controls, collision detection, and custom graphics rendering for an engaging gameplay experience.

MAJOR PROJECTS

MINA

- A modern and intelligent telemedicine platform developed to offer a seamless experience for online medical consultations, appointment bookings, and AI-assisted healthcare support.
- Built using cutting-edge technologies like React, Firebase, Node.js, and Groq's LLaMA 4, MINA ensures a responsive interface, secure data handling, and AI-powered medical support for users.

Chitra Tech Website

- Designed and built as a full-service IT company website, this platform serves as a digital storefront for modern software development services.
- It delivers a high-performance, responsive interface to present technical solutions, service packages, and company expertise to prospective clients.

PERSONAL PROJECTS

NEW ERA

- Designed as a modern digital footwear boutique that reimagines online shoe shopping through high-performance visual storytelling and interactive sizing tools.

Bodhisattva Website

- Designed and engineered as an immersive digital hub, this platform digitizes the museum and gallery experience to make fine art accessible from anywhere.
